Unfolding: data statistics
Unfolding: MC model dependence
Unfolding: regularisation
Secondary-interaction removal
Unfolding: closure
Unfolding: response-matrix MC statistics
Hadronic energy scale
Calorimeter cluster energy scale
Hadronic polar angle
Electron energy scale
Electron polar angle
Hadronic $E - p_z$ resolution
Luminosity
Track-finding efficiency
Hadron azimuthal-angle prior
QED radiative correction: model
QED radiative correction: MC statistics
Background: generator model
Background: low-Q^2 normalisation
Background: subtraction stage
Background: fake-track fraction
Q^2, x bin-edge migration residual
Initial-state-radiation z shift (zero)
Background: normalisation
Non-primary track normalisation
Hadron loss in detector material
Total (all 26 terms in quadrature)
